## List of ships that operated in Antarctica during the 2020/21 season, with call signs and names.

The SCAR and WMO request that all ships operating in Antarctic waters should make meteorological observations and report them on the GTS.

The following ships, which entered Antarctic waters in 2020/2021, made at least one meteorological report, they may have reported from outside Antarctic waters outside the date given here. For most ships the season begins in November or December and ends in March. Country is the country of registration, VOS is the country of recruitment. Monitoring is manual and may miss some ships.

## Notes:

Some ships, which also or primarily send messages via an AWS, are listed twice

The following ships have transmission issues:

C6TQ2 Present in March
CCLA Present in April
CA5744 Present in June

The following ships and yachts are known or suspected to have visited Antarctic waters in 2020/2021, but no synoptic reports were received whilst south of 60°. Most records are via Palmer AIS and Global Fishing Watch, though the latter misses many fishing vessels. It is clear that some other ships (tourist, cargo, research, fishing and yachts) have visited, but no call-sign information was available for them. Launches are not monitored. Where the call sign is not known an MMSI number is given.

The following ships may or have operated in Antarctica over the last five years, but are not positively known to have done so in 2020/21. This list has not been fully updated with VOS status. The latest report is either the date of any noted on the GTS or the last time the ship was known to be in Antarctic waters, but may not be definitive as this section is updated on an ad-hoc basis:
