

List of ships that operated in Antarctica during the 2021/22 season, with call signs and names.

The SCAR and WMO request that all ships operating in Antarctic waters should make meteorological observations and report them on the GTS.

The following ships, which entered Antarctic waters in 2021/2022, made at least one meteorological report, they may have reported from outside Antarctic waters outside the date given here. For most ships the season begins in November or December and ends in March. Country is the country of registration, VOS is the country of recruitment. Monitoring is manual and may miss some ships.

Notes:

Some ships, which also or primarily send messages via an AWS, are listed twice

MBBJ7YM has call sign FMNB, but has not sent observations with it

This year there are many reports from unknown ships; these may be pseudonyms of ships with known call signs

The following ships may have transmission issues or may be reporting using one of the unknown identifiers:

C6TA8	No observations in November, March
C6EE2	No observations in December
C6MQ5	No observations in January, February
C6TA8	No observations in January, February
C6WR2	No observations in February
FLTU	No observations in November, January, February, March

The following ships and yachts are known or suspected to have visited Antarctic waters in 2021/2022, but no synoptic reports were received whilst south of 60°. Most records are via Palmer AIS and Global Fishing Watch, which has recently updated its system. It is clear that some other ships (tourist, cargo, research, fishing and yachts) have visited, but no call-sign information was available for them. Launches are not monitored. Where the call sign is not known an MMSI number is given.

The following ships may or have operated in Antarctica over the last five years, but are not positively known to have done so in 2021/22. This list has not been fully updated with VOS status. The latest report is either the date of any noted on the GTS or the last time the ship was known to be in Antarctic waters, but may not be definitive as this section is updated on an ad-hoc basis:
