## List of ships that operated in Antarctica during the 2023/24 season, with call signs and names.

The SCAR and WMO request that all ships operating in Antarctic waters should make meteorological observations and report them on the GTS.

The following ships, which entered Antarctic waters in 2023/2024, made at least one meteorological report, they may have reported from outside Antarctic waters outside the date given here. For most ships the season begins in November or December and ends in March. Country is the country of registration, VOS is the country of recruitment. Monitoring is manual and may miss some ships.

Notes:

Some ships, which also or primarily send messages via an AWS, are listed more than once

There are many reports from unknown ships; these are likely to be pseudonyms of ships with known call signs, some of which are listed here, with others listed below with their names.

Some ships may have transmission issues or may be reporting using one of the unknown identifiers:

The following ships and yachts are known or suspected to have visited Antarctic waters in 2023/2024, but no synoptic reports were received whilst south of 60°. Records are from direct AIS transmissions, via Palmer AIS and from Global Fishing Watch, which has recently updated its system, though no data was available for 2024 March. It is clear that some other ships (tourist, cargo, research, fishing and yachts) have visited, but no call-sign information was available for them. Launches are not monitored. Where the call sign is not known an MMSI number is given if possible.

The following ships may or have operated in Antarctica over the last five years, but are not positively known to have done so in 2023/24. This list has not been fully updated with VOS status. The latest report is either the date of any noted on the GTS or the last time the ship was known to be in Antarctic waters, but may not be definitive as this section is updated on an ad-hoc basis:
